## EDUCATION

### Indian Institute of Technology

Bachelors in Data Science and Applications (CGPA: 7.89)

Chennai, Tamil Nadu

Sep 2022 – 2026

### Udit Narain Inter College

Intermediate Education (72%)

Padrauna, Uttar Pradesh

2018 – 2020

### R.S.I.C Ramchandarpur

High School Education (82%)

Kushinagar, Uttar Pradesh

2018

## EXPERIENCE

### Full Stack Software Development Intern

Fizmaa

Remote

Present

- Developing FizMaa Cashless, a high-performance NFC payment ecosystem for live events, capable of processing offline checkouts over local edge networks.
- Building a cross-platform Companion App and Android POS terminal using React Native to enable fast, reliable, and offline-capable transactions.
- Architecting scalable backend services with FastAPI and PostgreSQL, implementing real-time asynchronous data synchronization between local event edge servers and cloud infrastructure.
- Designing a real-time administrative web dashboard using Next.js and WebSockets to monitor live transaction velocity and event analytics.

### Data Analytics Trainee

Microsoft Elevate & AICTE (1-Month Training Program)

Remote

2026

- Developed Business Intelligence Dashboards:** Designed an interactive Power BI dashboard to solve hyper-local demand forecasting challenges for quick-commerce dark stores.
- Integrated Machine Learning Outputs:** Transformed predictive outputs from an XGBoost regression model into clear, actionable visual insights using Power Query and DAX.
- Automated Anomaly Detection:** Implemented native AI tools within Power BI to automatically detect traffic anomalies and explain sudden spikes in hourly delivery demand.
- Data Processing:** Cleaned and engineered features from over 8 million historical order records to facilitate accurate 7-day forward-facing inventory predictions.

## PROJECTS

### School Management System | React, FastAPI, PostgreSQL, Gen AI

- Architected a centralized management platform to eliminate manual administrative overhead, featuring secure Role-Based Access Control (RBAC) for Admins, Teachers, Students, and Parents.
- Leveraged Groq, Llama, and LangGraph via FastAPI to power an automated AI chatbot and Notice Board, enabling instant context-aware queries and school announcements.
- Engineered a high-performance backend using FastAPI and PostgreSQL to securely orchestrate complex institutional workflows, including dynamic timetabling, fee tracking, and attendance.
- Developed tailored React dashboards protected by robust JWT session security, delivering a seamless and secure user experience across all four distinct user portals.

## ACHIEVEMENTS

**1st Place Winner** | Syngenta Hackathon, Paradox'2026

**Scholarship Recipient** | Awarded financial merit scholarship for academic excellence

## TECHNICAL SKILLS

**Languages:** Python, C, Java, JavaScript, SQL (PostgreSQL, SQLite), Bash

**Frameworks:** Django, Flask, Vue.js, Flutter, React Native, Next.js, Bootstrap, FastAPI, RESTful APIs

**Developer Tools:** Git/GitHub, Docker, Linux Command Line, Redis, Celery, VS Code

**Databases & ORMs:** PostgreSQL, SQLite3, SQLAlchemy

**Machine Learning & Data:** TensorFlow, Keras, scikit-learn, Pandas, NumPy, OpenCV, Power BI, Matplotlib
